

Give Life Trough

Application: Prevention of diseases in livestock and poultry. Promotion of immunity

Introduction

Give Life Trough is safer than chemical alternatives and eliminates the need for expensive antibiotics for the treatment of chronic illness and infection. Prevent the following diseases in livestock:

- Crypto
- Coccidiosis
- Diarrhoea
- Dysentery
- Pneumonia
- Pulpy kidney
- Septicaemia
- Skin diseases

Principle of operation

This product is formulated using a blend of naturally occurring probiotic bacterial strains and organic soil carbons that are rich in fulvic and humic acid. The natural medicinal and anti-microbial properties of these soil based organic elements are well documented in helping to fight against illness and infection in both humans and animals. Give Life Trough is a potent natural antibiotic that destroys bacterial, fungal and viral infections and eliminates disease causing pathogens.

Dosage

- **For general immunity:** Mix 1 litre per 1000 litres of drinking water, once a month

Additional comments

- For best results it is critical to dose during calving and lambing season
There is no withdrawal period for meat, milk or egg production
